The Research Guide to Japanese Film Studies provides a snapshot of all the archival and bibliographic resources available to students and scholars of Japanese cinema. Research on Japanese cinema has always been an uphill climb. The first studies in Japan were written before 1920 and were faced with social prejudices that, fueled by the hysteria over the popularity of crime films like *Zigomar*, viewed the movies as vulgar entertainment or, worse, the source of cultural or moral degradation. Above and beyond that, Nornes and Gerow's Research Guide to Japanese Film Studies constitutes a comprehensive overview of the impressive dimensions and depth of the print culture surrounding Japanese film, and a guideline for future research in the field. This is an essential book for anyone seriously thinking about Japan and its cinema. Guides to Japanese Studies resources available at WUSTL Libraries and on the World Wide Web.
