

# Download Social-Ecological Systems In Transition

The purpose of the chapter is to show our empirical evidence from Zambia and the dynamics of farmers' livelihoods in response to various shocks, discuss whether threshold can be defined in the context of food security in social-ecological system, and, lastly, investigate the role of institutions to build adaptive capacity of the communities. This book presents an overview of current knowledge about social–ecological systems (SESs), a productive new field dedicated to understanding the relationships between human society and nature. To make the reader aware of how SESs are necessary to maintain our society, the book begins with a broad social ecological systems in transition global environmental studies.
