We use cookies to offer you a better experience, personalize content, tailor advertising, provide social media features, and better understand the use of our services. The book opens with an overview of cognitive assessment research and nonparametric and parametric person-fit statistics. The Q-matrix theory is then introduced followed by the Rule Space method. Various properties of attribute mastery probabilities are then introduced along with the reliability theory of attributes and its connection to classical and item response theory. The book concludes with a discussion of how the construct validity of a test can be clarified with the Rule Space method., Cognitive Assessment An Introduction To The Rule Space Method Multivariate Applications Series.
