

Download Fracture Management For Primary Care

Fracture Management for the Primary Care Physician: When is it "safe" to treat the fracture? The primary care physician who wishes to manage fractures needs to know what is "safe" to treat, and what should be referred to a specialist. A hip fracture is a break occurring at the top of the thigh bone (femur), near the pelvis. An estimated 19 000 people in Australia over the age of 50 were hospitalised due to a hip fracture in 2011-12. Burke Primary Care is a comprehensive family practice dedicated to high quality, patient-focused healthcare. Treating patients from birth to seniors (geriatric) in wellness and acute illness care, Burke Primary Care is a locally owned, independent family physician medical practice.

1.1 Imaging options in occult hip fracture. 1.1.1 Offer magnetic resonance imaging (MRI) if hip fracture is suspected despite negative X-rays of the hip of an adequate standard., Fracture Management For Primary Care.
