

Download Technology Transfer For The Ozone Layer Lessons For Climate Change

The ozone layer or ozone shield is a region of Earth's stratosphere that absorbs most of the Sun's ultraviolet radiation. It contains high concentration of ozone (O₃) in relation to other parts of the atmosphere, although still small in relation to other gases in the stratosphere. Get the latest science news and technology news, read tech reviews and more at ABC News. The Montreal Protocol on Substances that Deplete the Ozone Layer (a protocol to the Vienna Convention for the Protection of the Ozone Layer) is an international treaty designed to protect the ozone layer by phasing out the production of numerous substances that are responsible for ozone depletion. Relationship between efforts to protect the stratospheric ozone layer and efforts to safeguard the global climate system: Issues relating to hydrofluorocarbons and perfluorocarbons - Key documents, Technology Transfer For The Ozone Layer Lessons For Climate Change.
