

Download Wind Up The Windows We're Coming In To Land

I recently reviewed a bogus mortality study handed to me by some very concerned citizens. Looking at the factors and flaws of the study, in my opinion there was a kill rate of 500-600 fatalities per MW per Year. The environmental impact of wind power when compared to the environmental impacts of fossil fuels, is relatively minor. Compared with other low carbon power sources, wind turbines have some of the lowest global warming potential per unit of electrical energy generated. According to the IPCC, in assessments of the life-cycle global warming ...wind resources and densely populated hubs in the US. It appears that only Minneapolis is near good (but not excellent, outstanding, or superb) wind. Coming to Steam and itch.io!
